

Faces of Need

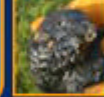

African Penguins are Vulnerable to Extinction. On Dyer Island their numbers have declined from 50 000 to 1 500 pairs.

Why?

African Penguins need your help **NOW!**

- Mankind over fishes and pollutes their oceans while supporting their enemies
- Man stole their eggs (28.7 million penguin eggs collected in the Western Cape) and destroyed their habitat (collected 1.8 million tons of guano)

How are we helping?

- DYER ISLAND CONSERVATION TRUST has been established for the conservation, rehabilitation and protection of the natural environment.
- Donations to the trust will be administered specifically for conservation purposes at Dyer Island and its surroundings
- Making fibre-glass penguin homes for Dyer Island, as they can no longer burrow into guano.
- Monitoring the success of the project.

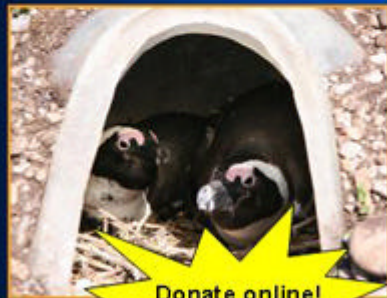

How can YOU help?

- YOU can sponsor a penguin home for only **R400 each**
- Artificial nests mimic natural burrows.
 - > Kelp Gulls can't take eggs and chicks.
 - > Penguins don't overheat or flood.
 - > These nests increase breeding success.

You receive:

- Certificate of sponsorship
- Penguin information
- Name on supporters list (www.dict.org.za)
- Access to website updates
